

Impact Powder

IMPACT PASTA

product data sheet

IMPACT PASTA - for use in diarrheal states and in prevention of intestinal infection

Ready-to-use **100% natural** complementary feeding stuff, on the basis of **IMPACT POWDER**, for calves (and other animals) during the first days, weeks after birth.

Apply preemptively after the first feeding with colostrum and in diarrheal states two times a day, according to the dosage on the packaging.

In an emergency of dehydration (bacterial diarrhea) apply a double dose. It works on the biophysical level by joining pathogens and regulating the intestinal transit and the permeability of the intestinal membrane.

Watering and feeding according to the approved recommendations.

The content - 60 ml, a tube dispenser of multiple use.

Ingredients - **IMPACT POWDER**, water, thickeners and stabilizers.

Recommendations of use (calves)

Up to 4 weeks	Single drench	Preventively - 1x15 ml after the feeding with colostrum, repeat periodically every 2 days. Alimentary diarrhea - 15 ml two times a day Bacterial diarrhea - 30 ml two times a day. Apply with feeding and watering according to the recommendations.
Calves	13-15 ml	
Sheep/Goats	3-5 ml	
Foals	20 ml	

For older animals - **IMPACT POWDER** powder with dosage recommendation according to the instruction
